She's International

[Babyface](#)

Oh, baby, oh baby, oh, ho
And she makes me lose my mind
It's the accent when she speaks, it's the way she holds her drink
It's that sexy little dance and the way she shakes that ass
It's the way she swings her hair, you can't help but stop and stare
And she'll make you lose your mind when you look into her eyes
She's international, she can go with me
And she's super-star material, she can roll with me
Yes, she's way past being beautiful, she can go with me, she'll go, ooh
You know she makes me lose my mind almost every single time
It's that sexy sweet perfume and the way she works the room
It's that naughty little smile that you know the girl gets wild
It's that air of confidence what she wants you know she gets
And she'll make you lose your mind when you look into her eyes
She's international, she can go with me
And she's super-star material, she can roll with me
Yes, she's way past being beautiful, she can go with me, ooh
You know she makes me lose my mind almost every single time
She's international, she can go with me
And she's super-star material, she can roll with me

Yes, she's way past being beautiful, she can go with me, she'll go, ooh
You know she makes me lose my mind almost every single time
It's a world of fantasy, she's a girl with mystery
When she walks into the club, all the players stop like, "What"
Watching every single move, they wonder who you're talking to
She can go, go with me, she can roll, roll with me
She can go, go with me
Makes me lose my mind almost every single time
She's international, she can go with me
She's super-star material, she can roll with me
She's way past being beautiful, she can go with me
You know she makes me lose my mind almost every single time
She's international, she can go with me
She's super-star material, she can roll with me
She's way past being beautiful, she can go with me
You know she makes me lose my mind almost every single time
She's international
She's super-star material
