

Revolution

Authority Zero

Look at the blueprints as they disappear
'Cuz of the blank space filled with all our fears
To make a move could be devastation
To take a chance is a way to face them
Make a it a choice to take a different road You want a revolution
You gotta make a difference on your own
Wanna revolution
Stand up, stand out and make it known You want a revolution
You gotta make a difference on your own
Wanna revolution
Stand up, stand out and make it known A new state relivation
A new day brings you to the nation
These days another way to replay, no replay
I think I'm better this way
Times up and can I say its okay, to late
I should've could've made me why wait
But in the end it could be my last big mistake You want a revolution
You gotta make a difference on your own
Wanna revolution
Stand up, stand out and make it known You want a revolution
You gotta make a difference on your own
Wanna revolution
Stand up, stand out and make it known Face first new days the choices we made
Face first new days the choices we made Face first our ability to chose I make a change
Instead a saying that its just fine
Time to open up and time to realize
You can make a difference if you try You want a revolution
You gotta make a difference on your own
Wanna revolution
Stand up, stand out and make it known You want a revolution
You gotta make a difference on your own
Wanna revolution
Stand up, stand out and make it known
You gotta stand out and make it known
You want a revolution
