# Nothing for Granted

## Brendan James

Leave you worries, leave your fears, leave the doubt you're holding dear
Leave them there love, by the door, they're no good anymore
Tell your friends you'll see them later, tell your family they can wait
You're only young once and only dream of the day that love will steal you awayRun away with me down these midnight streets, we will take
Nothing for granted, Nothing for granted
Come away with me life is short and sweet, we will take
Nothing for granted, nothing for grantedStop the seasons drifting by, stop believing they're no time
Stop your heart from closing off, I think you deserve it all
Love your future, love your past, love your body it's all you have
Love your secrets bottled up, but love them more when you give them upRun away with me down these midnight streets, we will take
Nothing for granted, Nothing for granted
Come away with me life is short and sweet, we will take
Nothing for granted, nothing for grantedYou gotta get outta your mind, there's many wonders to find
There's so many words they could write across your early grave
So come on and open your eyes, I will be right by your side
And we will see love lies in everythingRun away with me down these midnight streets, we will take
Nothing for granted, nothing for granted
Nothing for granted, nothing for granted
Come away with me life is short and sweet, oh
Nothing for granted, nothing for granted
