

# No Time for Learning

## Union 13

Nothin' is free, yeah, there's no time for learning  
To regain our strength or full use of our brains  
It's all artificial, real life's, jerry springer  
Yeah, we lost our minds and we ain't getting any better  
Prayers don't get answered all the time  
So wake up after all luck is the residue of design  
My days are all long but my weeks are real short  
I'm chemically imbalanced and it won't work for me in any court  
I'm going postal today, this anger has made  
me insane  
I feel jealousy towards the dead  
Life pressures just fucked up my head  
And I believe the meaning of life has been lost  
The meaning of life has been lost  
Comfort in progress, I can't take that nonsense of politics  
After all, it's designed misery, the smoke screen is thick  
And it's fumes make me sick when they reach you, it's not good  
Their purpose is to keep all you in line  
For the rest of your meaningless lives  
Take initiative now, by standing up and being productive  
One thing that stops us is ourselves  
No one else, yeah, we've lost our minds  
And we ain't getting any better  
I'm going postal today, this anger has made me insane  
I feel jealousy towards the dead  
Life pressures just fucked up my head  
And I believe the meaning of life has been lost  
The meaning of life has been lost
