

# Hypogastric Combustion By C-4 Plastique

## Cattle Decapitation

We have our ways to make you die  
Your request for a pleasant death has been denied  
1,000 degrees  
disintegration above the knees  
C-4 plastique strapped to your chest  
Detonation is imminent - a loud, unsightly death  
Jammed in your rectum  
Duct-taped to your genitals  
Detonation is imminent  
Flesh is flammable  
Within the blackened soil of a human heart  
Awaits the bastard to be blown apart?  
Unstable explosives lodged between your teeth  
A pharyngeal depth charge - dissolve what lies beneath  
Level zero trauma - deceased on impact  
Volatile incendiary turns crimson insides black  
Obliterate all plexus  
Packed hypogastrium  
With plastique and dynamite  
Appendages take flight  
Detonate. Volatile. Discharge  
Epicenter. Relocate. Renovate.  
All systems destroyed. Annihilate  
Phrenic, hepatic, renal, spermatic  
A bursting collage of human anatomy  
The structure dissolves in goreified calamity  
Jammed in your rectum  
Duct-taped to your genitals  
Detonation is imminent  
All flesh is flammable  
Hypogastric combustion - airborne pieces spread  
Umbilical prolapse - fragments - a crimson shade of red
