# Without Wings

## The Butterfly Effect

Mould me, human clay
Broken cutaway
Using me puppet strings
still born (I'm still born), without wings
broken wings

I've ruptured, the fragile sea
taken a life you steal
Embryo and always too (always too)
when building blocks, fall down on you

without wings your without wings
why wont you find the reasons why
your without wings your without wings
smashing all your precious things
your ruining (x4) me
I don't bleed without you

Trauma, my mistake
ending are we made to break
new threshold the more you wait
I'm breathing under water (x7)

without wings your without wings
why wont you find the reasons why
your without wings your without wings
smashing all your precious things
your ruining (x4) me
I don't bleed without you

precious things
without wings

if I'm dreaming your awake is it real
inside me sickness mine to take
yours to feel
u cocoon inside your own
temperate stain
breathing new life into my lungs

your not breathing

your without your without wings you left me here
you precious things your precious things you broken, broken
