

Stay Gone

The Get Up Kids

I'll fawn over photographs that you never would get to see
Swallow your own neglect with your miserable company
Your daughter forgot her memories
Your daughter forgot her, remember this I'm over the precedent of a false security
No matter how I come back you can never be proud of me
It's too long to stay gone
I don't regret what words were said, deserved respect, you never had
Watching the world keep falling around you
I don't expect your hand in this under duress and influence
Watching the world keep falling around you
I'll fawn over photographs that you never would get to see
No matter how I come back you can never be proud of me
It's too long to stay gone
I don't regret what words were said, deserved respect, you never had
Watching the world keep falling around you
I don't expect your hand in this under duress and influence
Watching the world keep falling around you
(Around you, around you)
I don't regret what words were said, deserved respect you never had
Watching the world keep falling around you
