

Fantasia

[Azrael](#)

Welcome to my world, close the gates
You've come from far away, I've been expecting you
You are the holders of the key to the story that never ends
Fantasia, resides deep in your heart
Leave your worries far behind
Fantasia, let the freedom ring the bell
Let us all unite, borders made of hate are gone
Nations singing the song of peace in Fantasia
How would it be? A world without hate
Without heaven, without hell
No wars, no arms, no religion, no God
Just your own truth
Fantasia can arise in you
Fear and darkness prevail
But finally they will fail
Fantasia, resides deep in your heart
Leave your worries far behind
Fantasia, let the freedom ring the bell
Let us all unite, borders made of hate are gone
Nations singing the song of peace, Fantasia
Fantasia, one day when love conquers all
Mankind will prevail, no more jealousy
Fantasia, no more envy no deceit
The nothing is gone, future's bright and glorious
We are all victorious, we are kings in Fantasia
