

It Starts at the Water

Teen Daze

I awoke upon the shore
Totally unsure of the landscape I had before me
Finally a place of endless wonder
And it was then that I saw you there
Wind coming through your hair
You smiled and took my hand and said
"Finally we can leave the pain behind"
And we fell into this dream
Orange sky and green beneath
We couldn't remember anything
Running through this endless place with you
And you held me close and said
"Here there is no death
We can live forever
All you have to do is give yourself"
I want to believe
This is forever
We can see past the trees
Yet they go on forever
I want to believe
This is forever
We can see past the trees
Yet they go on forever
I want to believe
This is forever
We can see past those trees
Yet they go on forever
I want to believe
This is forever
We can see past the trees
How they go on forever
But it starts at the water
It starts at the water
It starts at the water
It starts at the water
