# Dicovered

## Kinnie Starr

Ever since the day you came
My life has not been the same
I wanna hear you say my name
The way you, you say it, you say itEver since the day you came
My life has not been the same
I wanna hear you say my name
The way you say it, you say itLover I just discovered what I love
Lover I just discovered, ohI wanna be the path that you take
I wanna be the stream that builds your lake
I wanna be the wish that you make at night
That you pass grow to tightWanna give you dreams and do degeon
All days up simesly
Wanna watch that light behind your rise
Called as wise as we see in the skyLover I just discovered what I love
Lover I just discovered, ohCome on up
Let, let myself be
Let, let myself be
Let, let myself be the beauty to seeLet, let myself be
Let, let myself be
Let, let myself beYou know it, you know
You know it, you feel it
You know it, you feel it
You know it, you feel itLover I just discovered what I love
Lover I just discovered, oh
Lover I just discovered what I love
Lover I just discovered, oh
