Wild In Your Smile

Dustin Lynch

Hey girl what's up, looks like you're good to go
Hop in, lets ride, take it down this road
You couldn't look any hotter
Reach on back and grab a bottle
Girl, lets get this party startedChorus:
You look just like a little angel baby
But I know you love a little danger, baby
Everything about you girl is just my style
You got some wild in your smileIf this crowd don't rock, we'll take it somewhere else
I wont complain if I get you to myself
Something tells me you don't care
you're up for goin anywhere
As long as that wind's blowin' through your hairRepeat chorusYou might have your mom and daddy fooled
You know just how, just how to play it cool
I know something that they don't
Girl I know just what you want
Tonight We're gonna find it down this road we're on...Cause, You look just like a little angel baby
But I know you love a little danger, baby
Everything about you girl is just my style
You look just like a little angel baby
But I know you love a little danger, baby
Everything about you girl is just my style
Yeah, you've got some wild in your smile
some wild in your smile
