

Bang The Doldrums

Fall Out Boy

I wrote a goodbye note
In lipstick on your arm
When you passed out
I couldn't bring myself to call
Except to call it quits Best friends
Ex-friends till the end
Better off as lovers
And not other way around Racing through the city
Windows down
In the back of
Yellow-checkered cars You're wrong
Are we all wrong?
You're wrong
Are we all wrong? This city says
Come hell or high water
When I'm feeling hot and wet
I can't commit to a thing
Be it heart or hospital Best friends
Ex-friends to the end
Better off as lovers
And not other way around Racing through the city
Windows down
In the back of
Yellow-checkered cars You're wrong
Are we all wrong?
You're wrong
Are we all wrong? The tombstones are waiting
They were half-engraved
They knew it was over
Just didn't know the date And I cast a spell over the west
To make you think of me
The same way I think of you This is a love song
In my own way
Happily ever after
Below the waist Best friends
Ex-friends till the end
Better off as lovers Racing through the city
Windows down
In the back of

Yellow-checked cars You're wrong
Are we all wrong?
You're wrong
Are we all wrong? Best friends
Ex-friends till the end
Better off as lovers
And not other way around Ex-friends till the end
Better off as lovers
