

Evolution

Bee Gees

There's a law in what we do
We got a quest for something new
Everything you witness seems to let you down
If someone gets you from behind
I got an open mind
And you've been thirsty for the friend you found
Close your eyes and make a wish
I don't wanna mess with Mother Nature
Knowing that you're mine
You said, I could see
You with another and we all get satisfied
It's a form of evolution
It's a kind of movin' on
An eternal source of pleasure in being the one
When your love is for the giving
It's a case of destiny
You know, we look for the same insane games
Got to be committal to a little deviation
So, I get all wound up inside
I can see your scene unwind
You dance together or you dance alone
And leave the real world in the air
Love it in leather, I don't care
Everything is legal in the danger zone
Close your eyes and make a wish
Later, we could cater to the animal
Knowing that you're mine
It's straight in my face
You and your lover and the brain is paralyzed
It's a form of evolution
It's a kind of movin' on
It's a cycle of emotion, in being the one
In the storm of revolution
What is done, can be undone
You know, we look for the same insane games
Got to be committal to the subtle variations
Close your eyes and make a wish
I don't wanna mess with Mother Nature
Knowing that you're mine
You said, I could see
You with another and we all get satisfied
It's a form of evolution
It's a kind of movin' on
An eternal source of pleasure in being the one
When your love is for the giving
It's a case of destiny

An eternal source of pleasure in being the oneIt's a form of evolution

It's a kind of movin' on

An eternal source of pleasure in being the one

When your love is for the giving

It's a case of destiny

An eternal source of pleasure in being the one
