

# Fuck the Police (live)

## Sodom

New age rebellion - anarchy  
Intoxicated with injustice of law  
Sneaking lives - mental decay  
Practice subversive dirty deeds  
No acts of grace - stand up and fight  
You are their slave but never questioned why  
Born on your knees - don't give a shit  
You are remote controlled but who is to blame  
Fuck the police  
Blaze of anger - deaf and blind  
The enemy that overshadows us all  
Out of control - disrotted minds  
The final judgement and the final day will come  
Too much pressure - too much power  
Until the point of no return  
Interwar period - martial games  
To find out  
What they try to ignore  
Eternal lies - vision of change  
When the dreams of freedom awake  
Methods of greed - bleeding hearts  
An easy target for the one with the gun  
Empty promises - better left unsaid  
Illusions shattered by mendacity and hate  
Supremacy - hungry to kill  
No more effectual fervent supplication
