

# This Temptation

## Blue

You wanna get it on right now I see  
I just wanna say that's cool with me  
But now the moment's come  
I've never been good at this temptation From the first time it felt so right  
I knew that right here is where I belonged  
With that black dress, I have to confess  
My intentions may have been wrong, baby (Hold on)  
This ain't the right time  
(You know)  
There's doubt in my mind  
(Don't want)  
To rush this, baby  
One night's not my style You wanna get it on right now I see  
I just wanna say that's cool with me  
Won't you take your time  
Leave it just a little to imagination I've been waiting for this night so long  
It's really hard just holding on  
But now the moment's come  
I've never been good at this temptation This temptation  
Oh, this temptation  
This temptation  
I've never been good at this temptation Every night, you've been on my mind  
Could you be the one I've been waiting for?  
'Cause your sweetest kiss, oh, I just can't resist  
That's the kind of thing you've got me beggin' for more (Hold on)  
This ain't the right time  
(You know)  
There's doubt in my mind  
(Don't want)  
To rush this, baby  
One night's not my style You wanna get it on right now I see  
I just wanna say that's cool with me  
Won't you take your time  
Leave it just a little to imagination I've been waiting for this night so long  
It's really hard just holding on  
But now the moment's come  
I've never been good at this temptation I know that we've both been here before  
That's why I really wanna be sure  
But now the moment's here

Never been too good at this temptation You wanna get it on right now I see  
I just wanna say that's cool with me  
Won't you take your time  
Leave it just a little to imagination I've been waiting for this night so long  
It's really hard just holding on  
But now the moment's come  
I've never been good at this temptation So long, get it on  
I never been good at this temptation You wanna get it on right now I see  
I just wanna say that's cool with me  
Won't you take your time  
Leave it just a little to imagination I've been waiting for this night so long  
It's really hard just holding on  
But now the moment's come  
I've never been good at this temptation You wanna get it on right now I see  
I just wanna say that's cool with me  
Won't you take your time  
Leave it just a little to imagination I've been waiting for this night so long  
It's really hard just holding on
