

# Time Can Never Kill The True Heart

## Stars

One step closer to the sea wall  
Looking down, you can see all  
Hold my hand so you don't fall  
Catch your breath as the gulls call

One heart out of two

One life, me and you

One heart out of two

One life, me and you

Last mile in the pale light

Take me home with you tonight

We'll touch till it feels right

You won't say, "Love" but I might

One heart out of two

One life, me and you

One heart out of two

One life, me and you

Made love and you muttered, "We're through"

One heart, but the mind was in two

One heart half filled with the dreams of a saint

The other filled with nothing but hate

I hope I die in the arms of a child

In a meadow where the thistles grow wild

One heart out of two

One life, me and you

One heart out of two

One life, me and you
