

Equilibrium

Project Pitchfork

Why are you crying my dear?
Do you think you're being
Treated unfairly again?
Well why do you think
This happened to you?
Don't you think there's
A reason for it?
Every effect has its cause
And every action returns to its origin
A pendulum that's pushed
Always swings back
So why are you crying my dear?
Why are you crying my dear?
Treated unfairly again
Have you ever treated
Someone like that before?
To injure someone means to injure yourself
To inflict pain upon some
Means to inflict pain upon yourself Everything has its two poles...
