Satellites

Tanner Patrick

I think I found a getaway
It's not only for the stars and airplanes
There's no way that we could stay
But I got us two tickets for the weekendLeave your troubles behind
Don't worry tonight they don't even matter
Taking off in a flash sit back and relax
Enjoy the viewWe're like satellites
Floating in the night sky
Getting high- waiting on the sunrise
You and I have never been better
When we turn we turn to satellites
We turn we turn to satellitesLandscapes and shades of gray
A blinding light shining on my face
We won't find better place
To feel a freedom like this
Leave your troubles behind
Don't worry tonight they don't even matter
Taking off in a flash sit back and relax
Enjoy the viewWe're like satellites
Floating in the night sky
Getting high- waiting on the sunrise
You and I have never been better
When we turn we turn to satellites
We turn we turn to satellitesI think I found getaway
It's not only for the stars and airplanes
There's no way that we could stay
So let's just call it our vaca...We're like satellites
Floating in the night sky
Getting high- waiting on the sunrise
You and I have never been better
When we turn we turn to satellites
We turn we turn to satellitesWe're like satellites
Floating in the night sky
Getting high- waiting on the sunrise
You and I have never been better
When we turn we turn to satellites
We turn we turn to satellites.
