Colour

[Alesha Dixon](...)

Thought that's how the world would be for me
I never knew what it was gonna take
Made some monumental mistakes
And saw the blue skies wash awayI was so lost, save me at all costs
When I need you baby, when I need you
When the lights off, I feel the rain fall
That's when I see you, that's when I see youColour, la la la, la la la, la la la, la la
It lived inside of my heart
You bought it back with your loveColour, la la la, la la la, la la la, la la
When it was all black and white
You made everything right
You make it right, right, right, rightI forgot who I was supposed to be
Reminded me of a hope again, you made me dream
Red, orange, yellow, blue, indigo, violet, green
You're the start and the end of my rainbowI was so lost, save me at all costs
When I need you baby, when I need you
When the lights off, I feel the rain fall
That's when I see you, that's when I see youColour, la la la, la la la, la la la, la la
It lived inside of my heart
You bought it back with your loveColour, la la la, la la la, la la la, la la
When it was all black and white
You made everything right
You make it right, right, right, rightIf the rain falls hard, I know where you are
I know where you are if the rain falls
If the rain falls hard, I know where you are
I know where you are if the rain fallsColour, la la la, la la la, la la la, la la
It lived inside of my heart
You bought it back with your loveColour, la la la, la la la, la la la, la la
When it was all black and white
You made everything right
You make it right, right, right, right
