

# Favorite Disease

## Thousand Foot Krutch

Wanting, watching, debating  
On which way to run to  
Haunted, voices, craving  
Someone to run to I haven't lost myself in a long time  
I never tried to care when I wanted to  
I just wanna be part of something  
I just wanna to be real like you Sometimes, I feel like a monster  
And times, I feel like a saint  
I'm on my knees  
You're my favorite disease Silent, warnings tell me  
That I've let things come undone  
Show me, teach me the way to heaven  
'Cause no other way can I haven't lost myself in a long time  
I never tried to care when I wanted to  
I just wanted to be part of something  
I just wanted to be real like you Sometimes, I feel like a monster  
And times, I feel like a saint  
I'm on my knees  
You're my favorite disease Closer, closer, closer to you  
I need to be closer  
Have closure, get closer to you  
Every step I take Sometimes, I feel like a monster  
And times, I feel like a saint  
I'm on my knees  
You're my favorite disease  
And I love the way you kill me  
Love the way you heal me Sometimes, I feel like a monster  
And times, I feel like a saint  
I'm on my knees  
You're my favorite disease  
And I love the way you kill me  
Love the way you heal me I love the way you kill me  
Love the way you heal me  
I love the way you kill me  
Love the way you heal me I love the way you kill me  
Love the way you heal me  
I love the way you kill me  
Love the way you heal me
