The Kitchen Floor

Little Green Cars

And in a moment, I had forgotten
All the things that you had said to me
I think just like a child
You try to burn my mind
All it is is dangerous to me[Chorus]
And through the kitchen door
I see you're on the floor
Said you never wanted me to see
I guess what's done is done
It looks like you had fun
I'll just go inside and watch tvI've been enough
And it gets rough
When all the people stare
Talk on the streets and in my faces
That we are not living
I'm just a cast you had removed when all the pain was over
I'll sit at home you'll never know
The things you make me think of
You make me think ofAnd when I think about
The times you carried out
Everything you said you never would
Pick up the telephone
I ring my friends at home
They say I should stop
I think I shouldAnd in a moment
I try forgetting everything you've ever said to me
I think about the mountain and how I've never been there
Probably because I was with youYou say enough
You think you're tough
To say to me it's over
I'm out the door
But I'm not sure if I've forgotten something
You lie awake you try to make amends
Cause your not sleeping
I'll sit at home you'll never know
The things you make me think of
You make me think of[Chorus]And through the kitchen door
I see you're on the floor
Said you never wanted me to see

I guess what's done is done
It looks like you had fun
I'll just go inside and watch tv
