Elements

Stratovarius

Elements
Wind, fire, water, earth
Elements
Fear, anger, sorrow, joyPools of sounds fill my mind
A universe of shapes
Kaleidoscope of colors
Stargardens blossom in their solitudeSpiral architecture
Here I'm standing
Here I'm wondering
Curiosity, thirst for knowledgeEye for an eye and the whole world will be blind
Oceans of madness drowning the hope of mankind
What kind of man kills because of ideology?
What kind of God justifies violence?I am begging for comprehension
While aggression tears the world apartElements
Wind, fire, water, earth, elements
(We are star children)
Elements
Fear, anger, sorrow, joy, elements
(That's what we are made of)Elements
Wind, fire, water, earth, elements
(That's what life's made of)
Elements
Fear, anger, sorrow, joy, elements
(That's what I'm made of)Wind, bringer of fright

Water, cleanse my soul

I won't give up the fight
I won't be losing hope
I hold on to what is trueElements
