Resurrection Code

Disarmonia Mundi

The uttermost attraction you repressed until tonight
is breaking free like a boundless stream of ravenous desire
Feral resurrection dancing on a wire celebrate the darkness
that is torturing your mindFlow your endless dreams are burning bright the resurrection code
Overflow of quivering shivers
Standing by the moon shapes
the night in meParalyze the senses from our state of disgrace we must fall
chase the end of nightmares by the pulse of midnight we're reborn
Lycannihilation face the endless night your meaningless existence
is a shelter between me and IFlow your endless dreams are burning bright the resurrection code
Rise for a midnight ride from a senseless life the resurrection code
Overflow of quivering shivers
Standing by the moon shapes
the night in meGalleries of shadows stain the crystal-moonlit night
The netherbreed is reborn hail the eve of your declineChasing the dreams of the endless night
Solidify the steps of timeFlow your endless dreams are burning bright the resurrection code
Rise for a midnight ride from a senseless life the resurrection code
me paralyze the senses from our state of disgrace
the senses from our state of disgrace we must fallOverflow of quivering shivers
Standing by the moon shapes
the night in me
