Dark Creedence

Nap Eyes

Dark creedence, over my glass
Over my glass now is gone
The dark shadow that came to pass
Over my shadow is gone
Finally free, heavy iron shawls and
Cold shoulders are gone
Open the key the deeper key
To find the life that was here all alongAnd when it starts it's already begun
Already begun
When it starts, and when it starts it's already begunOld NASA you found the soul
That runs through the blood that runs through your veins
Old NASA found a great miracle
Unlocked an astrophysical plane
A long way gone, still a long way to go
But we'll always come back again
Until the day when everything
Ends and begins again(instrumental)Here in your church on a Christmas Eve
And the mystery rises again
For sure don't understand your ritual
But I am drinking your wine again
Got big plans, got big ideas
A lifetime to defend
Just get my drinking under control
And I will live againDark creedence, over my glass
Over my glass now is gone
The dark shadow that came to pass
Over my shadow is gone
Finally free, heavy iron shawls and
Cold shoulders are gone
Open the key the deeper key
To find the life that was here all along
