Fire With Fire

Stick To Your Guns

To Stan om my two feet, to lock these trembling knees this is what we need to not fall in the defeat they cant break me down, yeah! and i am tired of fighting fire with fire we've been misplaced we've been defaced but our heart will never be erased, fire with fire we've been misused we've been defused but this fight we will not lose and i will resist to ever make a first Lets go! resistance marked as a weakness, ignorance marked as intelligence i stand in defiance, I stand in defiance our violence has left us with a head made of stone and a heart just as cold, a youth overdosing on animosity and loathing has made us close the gates and create a beast a being like no one has ever seen, we have made ourselves mere men among giants may you stand with me in defiance may our only defense be letting down our defense let defenseless left free of all our fences no longer will hostility guide us and no longer will hate divide us no longer will violence undermine us no longer will hostility guide us no longer will hate divide us and no longer will violence undermine us fire with fire we've been misused we've been defused but this fight we will not lose, will not lose, will not lose
