Operation Ground And Pound

Dragonforce

Smashing through the boundaries
Storming through the burning fields
Stand before the evil one, on towards the molten sun
Falling under skies of pain
Soldiers searching endlessly
Crashing over seven seas
Torture in the winter sky, riding over plains of ice
Shadows in the fields of the slain
Crashing steel and rage you feel
We'll smash the cross, destroy the army
Crush the legions of the twilight
Devils have seen our way
Cry far away, as we reach for the day
Passing our way through the punishment and the pain
Reach for the one, as the sky begins to fall
Rising through the darkened ashes praying that we'll see a light
Far away, will our eyes now see the day
For today, the everlasting eternal sun
Washed away, the dreams of a brighter day
Forever hold the dream inside
The chance to fight another fight
The breaking hearts that stand for all our lives, live tonight
Watch you die, I watch you die inside
While fear controls your life
Then reject this animosity
With this and any mind

We feel the power deep within
The fear you hold inside
Just to find the reason for the treason
Now you will be mine
Screams of pain without the sun
We'll rise again from hell defending
Play the harps, we'll lift the fire
Warriors of flame will be slain
Rise through the pain, like the sun will rise again
Day after day but the memories never change
Stand before the storm, as the last horizon falls
Blinded by the vision of the innocence of our souls

Far away, will our eyes now see the day
For today, the everlasting eternal sun
Washed away, the dreams of a brighter day
Forever hold the dream inside
The chance to fight another fight
The breaking hearts that stand for all our lives, live tonight
Far away, will our eyes now see the day
For today, the everlasting eternal sun
Far away, will our eyes now see the day
For today, the everlasting eternal sun
Washed away, the dreams of a brighter day
Forever hold the dream inside
The chance to fight another fight
The breaking hearts that stand for all our lives, live tonight
