

Motel 74

Carina Round

I stole into the eyes of a boy singing the blues
Hair jet black, he'd stars for shoes
Smoked his cigarette 'cos his lips had touched it and I found out soon
He sure knew how to use a hotel room I could open my hands and let the rain come down
But you're just too close to a dream I had
I'm scared, I don't know why I, I do
But I miss you He stood there restless, waiting for me
Body hummed with colors I have never seen
So we keep on burning like two stars in the same constellation
Screaming through the air with a look like the light leaving
He said, I've known you for a thousand years I could open my hands and let the rain come down
But you're just too close to a dream I have
And I'm scared and I don't know why
I couldn't watch you go, I can't watch you go
You know it sounds strange and untrue
But I miss you Girls on the streets, shine ruby lips
Black straight hair from the tip to hip
Brown eyes blazed under blue eyelashes
Feel how you feel Little girl, watch out
Little girl, be proud
Little girl, get out Little girl, watch out
Little girl, be proud
Little girl, get out Little girl, watch out
Little girl, be proud
Girl, get out
