

Deliver Us

In Flames

Remind me
I'm golden
The fortress above the sun Why don't you spend nowhere with me
Follow the river and the path of the ones
Write our names on the shore
Forever - I can't find
Struggling in a world undefined
Decide how you want it to be
I'm not eternity Fly into the distant
Disappear for a while
I can't make sense of this
But we're here today feeling alive It starts to fall apart
Let me take control
Reminisce
The days and nothing more
Something I will find again
Deliver us Can't hear the words you say
Doesn't really matter
I give the world to you
If you just... Fly into the distant
Disappear for a while
I can't make sense of this
But we're here today... Alive! Fly into the distant
Disappear for a while
I can't make sense of this
But we're here today alive
