

Fire

Black City

So you let it off your shoulder
And you started to grow wild
Instead of growing older
And the lines became closer
But you thought you've seen it trough

You want to reach for the skies
But you somehow lost the way
So you keep rolling the dice
Think twice
Cause in your eyes
In my eyes

There's a...
Fire!!
Fire!!
In your eyes
In my eyes
There's a fire

So the search became your mission
And I watched you fade away
In a deep depression
No answers for your questions
And you blew your my mind away

You should see yourself
What you have become
It's not every experience
That makes you strong
