

# Your Mistake

## My Former Self

Its midnight  
My blanket's never felt so cold  
Your memory's grown old  
And I can feel your ghost deep within these walls  
Where do you get off saying  
Anything goes?  
I have tried to heal my misery  
I've lost my everything  
I've lost my everything  
With rusty nails for rhetoric  
You're armed with a sense of denial  
I'll tell you forever  
That this is your error  
Your mess up, your mistake, your fault  
and I will carry on  
Where do you get off saying  
Anything goes?  
I have tried to heal my misery  
But absence makes the heart grow fonder
