

Photosynthesis

Caldera

today,aliens escape from the andean sea,
our communities become sanctities of light, tonight we will fight for our rights, our might will be tight.today,
foul games turn into foul play,our oppurtunities become documentaries of
kites, tonight we will right for our night, our fight will be right.

"I could feel myself fading away into outer space and I felt the weight of constant pace in my compact car of
eternity tugging and pulling at my maternity, I was lost in oppurtunity that I sucked at the virginity of my
lifeless dreams.

I was lost and I escaped from the life that I once knew to be true in my own backyard were I found the card. She
gave me a look, I was a crook, she wont return what she took from my love, she escapes. Life is just a race.

Dont forget your face when you take the bait."

So here we are in Las Vegas,this is the stuff that makes us,insanity, so beautiful, so beautiful,when I'm with
you.So the lights shine bright on this Vegas night,so lets not fight, this gorgeous night,forget me not,because it
may leave a spot,but believe it or not,

"I care ALOT.tAkE Five Joe,cut it,record this."

Sunrise, sunset, I won't forget.Travel far, travel hard,dont let them in just yet. I'm so hard to get, and yet,
you find yourself a constant threat,

regret! But those opinions dont matter,

we may rise with a ladder,but what we are is what we're not,and you forgot,this hellish underworld, were people
rot,it's all we've got, cause hell is not, in other people,we are all we've got, or not?

"Ok, That's good, leave it like that Joe."
