

Minority

Subhumans

Don't ask the people what the people think
They've got no opinion but they still think we stink
The great British public, the great majority
The safe foundation of our societyBut we're the m
We're the minority, won't go away
We're the minority and we're OK
We're the minority, got something to sayYeah we're the minority the ones with the brains
Putting the country on a nervous strain
They can't stand the truth--the truth never lies
The great British public got bricks in their eyesBut we're the minority and we're OK
We're the minority, won't go away
We're the minority and we're OK
We're the minority, got something to fucking say
