Told y'all I was gonna bump like this
Y'all didn't think that I could bump like this
Said I told y'all I was gonna bump like this
Turn around then I make it jump like this
You wanna keep that boy that make it jump like this
Y'all didn't think that I could make it bump like this
See I told y'all I was gonna jump like this
How you not gon' know it when it hit like this?
Ladies, drama, leave it home
If he ain't got it right by now then scratch him off
They just called me, said it's about twenty strong
They standing at the door they wanna take us on
The ring, let it go 'bout three months ago
The pain, the stressin' ain't in me no more
The girl that they used to know done changed
Now they say a 'Miss' befo' they mention my name
Told y'all I was gonna bump like this
Y'all didn't think that I could bump like this
Said I told y'all I was gonna bump like this
Turn around then I make it jump like this
You wanna keep that boy that make it jump like this
Y'all didn't think that I could make it bump like this
See I told y'all I was gonna jump like this
How you not gon' know it when it hit like this?
See satellite, 664 came up real slow
Put a good game on me
Told the partner don't get too close or come too bold
'Cause the quick ain't fo' me
Got my girls all here, near me
So spare me please all your personal info
I ain't thinkin' 'bout love, I just wanna get it up
Pop a bottle talk a lot of bullish and let's, and let's go
Told y'all I was gonna bump like this
Y'all didn't think that I could bump like this
Said I told y'all I was gonna bump like this
Turn around then I make it jump like this
You wanna keep that boy that make it jump like this
Y'all didn't think that I could make it bump like this
See I told y'all I was gonna jump like this

How you not gon' know it
Wait a minute mother
Tonight ain't feeling no
To my girls that's looking their best
Won't you go and show it off for us
Ladies go and throw your hands up
And if he's all in your head
Just forget all the things that he said
Girl this is yours, do whatever you want to
Ladies go and throw your hands up
Hear these words out my mouth now, tell you how it's goin' down
Kelly, E V E, we comin' through and got 'em bowin' down
Ladies can you feel it? It's a anthem you can bounce around
Gave you just a sip to take your breath, bring it back now
Dudes get excited, seeing what they likin'
Hopin' they the one you choose, hope they get invited
Late night rendezvous's is alright
But we loving how the club vibratin', it's enticin'
Let the beat knock, trust me we ain't gon' stop
Head 'til the lights up, watch us take ova the spot
Few mad looks from them chicks, you know
And from them dudes who be jealous of a chick wit dough
Pop anotha bottle for dem, keep my life movin'
No time fa the drama watch me blow through them
I know I sound confident I'm supposed to though
We do it big how we live Kelly told you so, come on
Told y'all I was gonna bump like this
Y'all didn't think that I could bump like this
Said I told y'all I was gonna bump like this
Turn around then I make it jump like this
You wanna keep that boy that make it jump like this
Y'all didn't think that I could make it bump like this
See I told y'all I was gonna jump like this
How you not gon' know it when it hit like this?
