

# Tears Fall

## Crossfaith

Meet one last time at our old place  
How did we let this fade away  
Tie up loose ends with simple smiles  
I lost the key, you lost it too You're walking right past me, pretend to be happy  
Cause I'm still trying to find, when we were doing fine  
I watch the rain wash away all my senses. Tears fall where once I held your hand  
Hear the echo of a melody  
Will I find a way to be without you  
In the mirror watch you drive away  
It's hard to swallow still the same  
Carry regrets about what I said  
You hold my key but I lost you You're moving on past me, pretend to be happy  
Cause I'm still trying to find, when we were doing fine  
I watch the rain wash away all my senses. Tears fall where once I held your hand  
Hear the echo of a melody  
Will I find a way to be without you  
Tears fall  
All alone is where I stand  
You cry the final melody  
Can I find a way  
Can I find it somewhere else  
I can't find it, can't find it somewhere else  
Tears fall where once I held your hand  
Can you cry for me again  
Tears fall where once I held your hand  
Hear the echo of a melody  
Will I find a way to be without you  
Tears fall  
(you're walking right past me, pretend to be happy)  
Tears fall  
(cause I'm still try to find)  
All alone is where I stand  
You cry the final melody  
Can I find a way  
Can I find it somewhere else  
I can't find it, can't find it somewhere else
