

Shine On

Gamma Ray

Music: Schlchter / Lyrics: Hansen

We drive, we drive, were riding on through the universe
Weve come to reach our destination planet earth
We come, we run, you cannot see us, flying in our
spaceships, shooting cross the sky
We explore and we all know what this is about
for us all
So many light years we have travelled far from home
Someday well be there I know
Shine on, Rising star
We travelled such a long way
But still you seem so far
Shine on, Rising star
for our belief in unity at heart
Rising Star
Come on and shine
Living was torture and dying release
A declining world, no future, no hope
We were passing the point of no return
So many light years, still we travel on and on
And someday we will call you home
Shine on, Rising Star
Diamond in the distance, still you seem so far
Shine on, Rising Star
Forever light the darkness in our hearts
Rising Star, Rising Star
Salvation, Damnation
We crawl across the sky with pain
Forever we will fly
Out in the darkness
Theres a never ending light
Solo: Both
Still we are far away
But well be there one day
Someday we will call you home
Shine on, Rising Star
We travelled such a long way
but still you seem so far
Shine on, Rising Star

Forever light the darkness
in our hearts
Rising Star, Rising Star
Shadows in the darkness, so far away from home
Standing all alone, noone there beside me
Shadows all around, so far away from home
I know Im not alone, it seems were lost in space and time
Shine on
Shine on now, and warm the tears
weve shed through years
Its our prison, final reason for the freedom
and the glory that we feel
Are you for real ?
Shine on, Rising Star
Diamond in the distance
Still you seem so far
Shine on, Rising Star
Forever light the darkness
in our hearts
Rising Star, Rising Star
Shine on, Rising Star
Come on and shine for us
Shine on, Shine forever more
Shine on, Our survival
Rising Star, the last chance for us all
The only hope for future and a home
For us all
For us all
Come on and shine, Rising Star
