

Only Forever

Oxen

Half cut, dreaming at the cliffside
Talking 'bout leaving
You know how I feel, that makes me feel good

We never loved this city
People so cold you get the shivers
I drew your cold hand close, it made me feel good
It made them look so sad
Let's stay like this, only for a while

Only forever, let's make out, make love just one last time
Then we're never coming back
Forever, now she's sleeping with somebody else
And I'm never coming, never coming back

I took you out for the weekend
Back to the cliffside
How I wished, that you would come along

To take you with me
But you never really let me
I used to think of you, it made me feel good

Now you just look sad
You would stay, only for a while

Only forever, let's make out, make love just one last time
Then we're never coming back
Forever, now she's sleeping with somebody else
And I'm never coming, never coming back

You say that you've made up your mind
Tomorrow we're going down south
That's why i love when we're drunk
I love how we lie

So please don't go to sleep
No don't go to sleep
I said soon's too late, you said you would stay

Yeah only for a while

Only forever, let's make out, make love just one last time

Then we're never coming back

Forever, now she's sleeping with somebody else

And I'm never coming, never coming back

Forever, Forever, yeah only for a while

Forever, Forever, Forever, only for a while
