

# Better Part of Me

## Pseudopod

Something says to me, "Don't be afraid"  
But if I don't worry I'll surely slip away  
I need to speak to you, hear what you say  
But if I breathe too hard, I think I'll go insane  
There's a part of me, so insecure  
Of all that I could have and all that I've gone through  
If there could be a way through a better design  
I'd probably screw it up and let it slip away  
Well, I wonder if I stayed here  
Would you become a better part of me

I can say now, that you changed me  
And I've become a better part of me  
I am the strongest I have ever been  
The very thought of you can't even comprehend  
The safest bet for me is to focus hard  
And try to face myself I can't take it anymore  
I hope I'm everything that I need to be  
You are my everything, so I'll just stay
