

Transmitter (Come Together)

Front Line Assembly

A jaded generation dissolves the unknown
Neurotic deprivation, no one left to own
Sinking endlessly into infancyLet's come together
Let's come togetherNarcotic imbalance, the energy is strong
Resilient and defiant, this claustrophobic song
So cold is the water, crouched into a ball
Like fragments of illusion, we all start to fallLet's all come together
Let's all join hands
Let's all march together
Let's do the war danceLet's all come together
Let's all join hands
Let's all march together
Let's do the war danceThe universe
The stars
The planets
CivilizationLet's all come together
Let's all join hands
Let's all march together
Let's do the war danceLet's all come together
Let's all join hands
Let's all march together
Let's do the war danceLet's come together
Let's come together
Let's come together
...
