

Miss You

Mat Kearney

You'll never be ready even when you know it's going to come
All of the memories beat in my chest like a drum
Feels like the last day oh of the rest of my life
All that I want to say I never could quite say goodbye And I got one call coming in the evening
I could hear the short breath that you're breathing
Said darling it's the way we fall
It's the way we fall
Close my eyes and put it in the picture
Carve your name in my heart like a scripture
Said darling it's the way we fall
The way we fall again Every time I break these chains
Every time I feel this pain
Nothing really ever changed
I'm gonna miss you
Even if I'm in the dark
Even if we're worlds apart
I can feel your beating heart
I'm gonna miss you Tonight I'm driving riding out alone into the night
Your somewhere flying riding up high in the clouds
You were the reason the first note I could ever sing
And I still believe in everything we dreamed that it could be And I saw headlights shining in the window
Looking down at a phone that never will call
Darling it's the way we fall
It's the way the way we fall
Last night I dreamed you were waiting
On a corner in the coat that you gave me
Said darling we were born alive
And we'll be born again Every time I break these chains
Every time I feel this pain
Nothing really ever changed
I'm gonna miss you
Even if I'm in the dark
Even if we're worlds apart
I can feel your beating heart
I'm gonna miss you
