

On a Good Night

Wade Hayes

On a good night I could hop in my truck
Round up my friends and with any kind of luck
We can end up howling at a harvest moon
On a good night I could put on my hat
Head down to the honky tonk and dance
But on a real good night I meet women like you Brown hair, blue eyes once in a life time countrified kind of girl
Heart-breaking, chance-taking wild little love making, shaking up my world
Hey on a good night I can picture the day and all my dreams come true
But on a real good night I meet women like you On a good night I can drive to the lake
Turn on the radio and find George Strait
Then go play a little game of eight ball pool
On a good night I might be found
Draggin' with the boys cross town
But on a real good night I meet a women like you Brown hair, blue eyes once in a life time countrified kind of
girl
Heart-breaking, chance-taking wild little love making, shaking up my world
Hey on a good night I can picture the day and all my dreams come true
But on a real good night I meet women like you
