Apology

B.M.C.

The problems in my head and I wish that I could make it easier
For you and I to deal with this as well
I like to run and hide but I got you by my side
And if it were you I'd be there till the end as well
There's no way around it
No time to cry about it
You know what hurts the most
Is to think about you all along, I swear I'm sorry
I never wanted this for you
But there's nothing I can do
So let's just take it day by day
I never wanted this to be
To be the end of you and me
If there's one thing that's true
I never make it without you
The problems in my head
Six months the doctor said
And I know it makes you mad
But I'm still here, don't forget
There's no way around it
No time to cry about it
You know what hurts the most
Is to think about you all along, I swear I'm sorry
I never wanted this for you
But there's nothing I can do
So let's just take it day by day
I never wanted this to be
To be the end of you and me
If there's one thing that's true
I never make it without you
Everyday is a brand new day
There's so much that I should say
And things won't be always going my way
I wanted you to know, I wanted you to know
I never wanted this for you
But there's nothing I can do
So let's just take it day by day
I never wanted this to be
To be the end of you and me

If there's one thing that's true
I never make it without you
I never wanted this for you
But there's nothing I can do
So let's just take it day by day
I never wanted this to be
To be the end of you and me
If there's one thing that's true
I never make it without you
