So Far

Cults

I have been trying hard to
Keep the static low
Drown out the trouble
You know is gonna come
Every day away, our distance oh it grows
Further and further, so close to letting goReach out a hand to me
It's not over
Keep all our memories
Bring them closerAnd I wonder how you sleep at night
You know that it's not just alright
Your static is so far from meI have been trying hard to get you all alone
Seems like the good days
Are never gonna come
Everything you say
I hear that awful tone
You're just so tired
Those words are not your ownDon't let them catch you
Those fears that you have
They creep all around you
You're never preparedAnd I wonder how you sleep at night
You know that it's not just alright
Your static is so far from meAnd I wonder how you sleep at night
You know that it's not just alright
Your static is so far from me
