Time To Grow

cssc

Last night I tried but I couldn't sleep
Thoughts of you were in my head
I was lonely and I needed you next to me
Life is harder since you left
I never meant to do you wrong
And now all is said and done
I hope you won't be gone too long, no
Where do I go, what do I do?
I can't deny I still feel something
And girl, I wish you could say
You feel the same, yeah
You've broken the bond, I gotta move on
But how do I end this lonely feeling?
You've gone, I'm here alone
I guess it's time to grow
I try to speak but my words never catch the air
Like you never knew I was there
Take me back to the days when you really cared
Can we make love re-appear?
I can't go on the roads too long
And now all is said and done
Can't go forward if my heart's still
Where I'm coming from, no
Where do I go, what do I do?
I can't deny I still feel something
And girl, I wish you could say
You feel the same
You've broken the bond, I gotta move on
But how do I end this lonely feeling?
You've gone, I'm here alone
I guess it's time to grow
Crying time is over
I know I can't control her feelings
If she won't return then I guess
I'll be a man and move on
Time to grow and move on
Make life better than it was before
And move on
Make love better than I did before

Time to grow and move on
Make life better than it was before
Though you've gone and I'm here alone
I guess it's time to grow
Grow, I'll grow, yeah
Think it's time to grow
