State Of Mind

Natasha Thomas

Everyone tries to tell you what to do
Most times when they don't even know you
But playin' it small is not the way to go
Don't be afraid to let your true self showGotta be strong minded and stand out
Don't just blend in with the crowd
In order to leave it all behind
You gotta change your state of mindEveryone's always gonna try to convince you
That they all know better than you do
So do please them most young dreamers
Would do whatever
And forget that their own opinions matterKeep you head up and feet your on the ground
If you let them take it too far there's no turning round
Don't you think that it's about time
To change your state of mindYou were made to be one of a kind
Look a little deeper
You'll be surprised what you find
Strength and peace of mind
Don't you ever be afraid to shineIt's all about your
It's all about your
It's all about your
It's all about your state of mind
It's all about your
It's all about your state of mindGo embrace your individuality
It's never better to fake it than to speak honestly
To see it when it's small, to see the way to go
Don't be afraid to let your true self showIn order to leave it all behind
You gotta change your state of mind
