

Back of My Mind

Cast

They say they'll take it away
to reassure them that the future is there
I hear the words that they say
but don't believe them
We take the control, the hours taking it's toll
From the back of my mind, I can hear you
From the corner of my eye, I still see you
We believe in you all Everything that you need is right besides you
But you turn it away
You've got an instinct inside, t
hat's there to guide you
When you make your own way
We chase the future today From the back of my mind, I can hear you
From the corner of my eye, I still see you
We believe in you all From the back of my mind, I can hear you
From the corner of my eye, I still see you
From the back of my mind, from the back of my mind
From the back of my mind Everything that you see stands right before you if you open your eyes
Understand your beliefs and we'll expect you to know where it's at
Man it's as simple as that From the back of my mind, I can hear you
From the corner of my eye, I still see you
We believe in you So take the control, the hour's taking it's toll
