

Should Have Known

Ignite

what happened here?
where did the bottom go?
when did you rush to crush the envelope?
suppose i should have known
all along the bullet - that came from the gun
pierced right through the target
hit more than one
(should have known) desperation - nothin look the same
checking for a heartbeat
chewing on the pain
suppose i should have known
right from the start the bullet - that came from the gun
pierced right through the target
hit more than one
(should have known) what a waste of life
and look what you've done to everyone after - all's been said and done
there's nothing much left to look at]
except a coffin
suppose i should have known
i was wrong the bullet - that came from the gun
pierced right through the target
hit more than one
(should have known)
