

# Electrick Gypsies

Steve Hillage

This world is waking up into the New Age revelation  
Our spirits are responding to the raising of vibration  
We'll use the latest sciences to aid our inner souls  
To set the wheels of love and light a-rolling down the road So who's gonna be an electric gypsy  
I wanna see the electric gypsies The gypsy life returns again in a form that's very new  
With motor-vans, electric sounds, and the colours of the rainbow  
We'll open up the old straight tracks and fertilize the earth  
Rediscover the healing sound and ride the psychic surf  
So who's gonna be an electric gypsy  
I wanna see the electric gypsies We're not forever travelling  
We also need to base ourselves  
To build the temples of the Electric Age  
Where our souls can grow The healing sound is coming and the peoples' ears are open  
Soon the world will see and hear the truths which can't be spoken  
We're looking for adventures to come and share the vision  
And travel across The Holy Earth upon a special mission So who's gonna be an electric gypsy  
I wanna see the electric gypsies And on those special occasions  
When we hit that cosmic chord  
The spirit of the Holy Octave  
Comes passing through to you  
We're talking of the labours and the work that must be done  
To purify, to sanctify, to stand inside the sun  
To enter in the pyramid, to conquer all our fears  
To light the blazing lamp of love and shine it bright and clear So who's gonna be an electric gypsy  
I wanna see the electric gypsies
