For You

Electronic

Can we meet on the street maybe tomorrow
See the world at our feet, naked and hollow
I'll even climb crystal and fine for you to see
With every step that I take, every move that you makeStay with me in this foreign land
Just long enough for me to make you understand
You could be my guiding light, the darkest of them all
You'd be the rise before my fallAnd yet we'd both get along fine
Better than most some of the time
When I'm with you, I am on fire
You are the chill and my desireCan we meet on the street maybe tomorrow
See the world at our feet, naked and hollow
I'll even climb, crystal and fine for you to see
With every step that I take, every move that you makeWhat do you crave what I can't possess?
You always ask for more until there's nothing left
These hollow words make a wrong arrest
They beat upon my door, a spirit haunts forever moreBut still I hope and sometimes I pray
It won't be hard, we'll find a way
Color my dream, show me I'm real
Turn on the light, then let me feelCan we meet on the street maybe tomorrow
See the world at our feet, naked and hollow
I'll even climb, crystal and fine for you to see
With every step that I take, every move that you makeCan we meet on the street maybe tomorrow
See the world at our feet, naked and hollow
I'll even climb crystal and fine for you to see
With every step that I take, every move that you make
