

Cry

Texas

You thought it was easy
To find what you need
If you'd only believe me
You'd find, you'd be free You're always trying to hide
Your secrets and your lies
You gotta let me know
Is it goodbye or hello? You said you'd write your name
In the skies, so do it
You knew you'd never make it that high
You blew it all, you had to have it all Oh, instead you wrote your name
In the sand, you knew it
You could've had the world in your hands
You blew it all, you had to have it all It's not the way you look, it's not the way you smile
It's not the way you stood there even in denial
It's not what you've become
And I'm not so sure you'd agree You're always trying to hide
Your secrets and your lies
You gotta let me know
Is it goodbye or hello? You said you'd write your name
In the skies, so do it
You knew you'd never make it that high
You blew it all, you had to have it all Oh, instead you wrote your name
In the sand, you knew it
You could've had the world in your hands
You blew it all, you had to have it all Save your love
Come on and save your love
Yeah, you know that we'll be fine
If we just take our time and save our love You said you'd write your name
In the skies, so do it
You knew you'd never make it that high
You blew it all, you had to have it all Oh, instead you wrote your name
In the sand, you knew it
You could've had the world in your hands
You blew it all, you had to have it all
You blew it all, you had to have it all
