

Light Years Away ("Passengers" Movie Theme Song)

G.E.M.

10.000 light years somewhere out in space
They practice love and they know what it takes
No competition and no jealousy
Living in freedom and humanity 10.000 light years away, light years away far from pain
Came to a place full of grace and of peace
10.000 light years away from our fear Suddenly it's ringing in my ears
Why is it now i don't want to be here
I feel like flow in that clock at the wall
God, how i wish that this dream would go on 10.000 light years away, light years away far from pain
Came to a place full of grace and of peace
10.000 light years away from our fear 10.000 light years somewhere out in space (10.000 lightyears)
10.000 light years somewhere out in space (10.000 lightyears)
10.000 light years somewhere out in space (10.000 lightyears)
10.000 light years somewhere out in space (10.000 lightyears) 3rd verse - on promo-lp 206 318-000 only!!!
Reality comes knocking at my door
I face the same obligations once more
Dreams took me 10.000 light years away
I'd give all i got if that's where i could stay
